Jackfruit problem

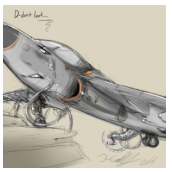
^^ beautiful frenchies^^ <3 (Dessault mirage)

^^BEHOLD!^^

So.. I have a Jackfruit problem. Its the kind of problem that represents a good 12 lbs worth of exotic Asian fruit that seems ok to eat in small sittings, but actually is a much larger pill to swallow when you buy the whole damn thing. (its a cross between a pineapple, a banana, and flowers/chlorophyll) And It seemed like a good idea at the time, till the floral taste becomes overpowering and it really fucks with you. I was doing so well too.. lost 7 pounds last month after I quit soda, Patched things up with family, you know.. Anyway, its looking like this was just as much of a mistake as the time I bought the Durian fruit for science! If you ever want to taste strange Asian fruit DO please ask a grocer to cut a sample for you to eat and or take home first, it'l save you a headache later.



In recent news, A new artist has shown up to take the reighns of proper airplane porn, and who would I never have expected in my wildest dreams? But none other then the Art director from Bad dragon toys himself Evalion (The world is really funny like that.) Been chatting it- slutting it- up with this fellow after he had an epiphany including and a rather tasty tongue and switch moment with the front landing gear of yet another blackbird in a museum in his own state/country. How strange though that it would be the Hind helicopter that he stood in the shadow of and thought back to that old commission I did of Anya for Delta. I have to say, I'm flattered.. as there isn't anyone aside from perhaps Lando who briefly took up the mantle and made some amazing things, Who is willing to personify the machines in a non anthro . I've fucking waited for days like these. Special thanks to Gunner who jumped all over that shit and broke the news to me as it was going down. Here's hoping this

one sticks with it for a month or two.

Wow look at me responding messages on time and doing things and not being suffocated by this thing that I call life! Hahaha! Ha...haa.... -flops down face first- -muffled crying-

Good luck with the job search Ratbat, I'm in the market for a new job myself so all we gotta do is keep our heads up and hope for the best!

As someone who's always been a fan of AIs, but of the way they interact with others, from machines and airplanes to spaceships, gundams, Zoids, and more recently anime like Battle Fairy Yukikaze (which I would sincerely suggest you guys check out)... to call stumbling upon this site "a breath of fresh air" might be a misnomer related to engine exhaust.
Aeromorphs are great – Walter Sache taught me that – but all I can say in response to all of these wonderful things here, and on nearby LIDAR, is "kudos, keep up the good work!" A-and a 'hello' too because it's nice to greet people.

I remember when you came in our little plane porn thread on /k/ and talked to us a little bit about it. That was really cool. Always looking forward to more.

@... M939 I still lurk /k/ but not as often as before. Really

good machine threads but I think the people over there think I'm a furry or something. Lots of hate.

Hope the job search goes well for you! Certainly I hope better than mine; I've been stuck at a gas station for the last three months.
